

FILTER CLEANER / CARBON REMOVER

PRODUCT DESCRIPTION

Powerful environmentally friendly industrial cleaner and degreaser.

FEATURES & BENEFITS

- Ideally suited for treating heavily contaminated machine parts, industrial machinery, tools, auto parts and all types of hard surfaces.
- Contamination is easily removed with little need for mechanical support.
- Safe for use on metal, plastic (PVC, ABS, PE, PU, acrylic) and rubber.
- Formulated on the basis of modern surfactants as an alternative to classical hydrocarbons.
- VOC free formulation.

USAGE

Preferably, use undiluted or for slight soiling dilute 10%-50% (1:10-1:1). Suitable for immersion cleaning, manual cleaning, rotary cleaning and spray rinse cleaning. Preferably, give the product time to work in. Using hot water increases the cleaning power. The recommended contact time is about 5 minutes, depending on the degree of contamination. Using the proper dosage protects the treated object against corrosion, pending further treatment and processing.

STORAGE

Keep package well closed, and store under cool but frost-free temperatures.

RECYCLING

Empty pack can be fully recycled when rinsed with water. Dispose of through the correct channel.
